IP Infusion Teams Up with STORDIS' #Back2Open Program to Provide Cumulus Linux Users a Migration Path Back to Open Networking

Stuttgart, Germany – October 18, 2021 – STORDIS – The Open Networking Expert, is pleased to announce that IP Infusion, a leading provider of network disaggregation solutions for telecom and data communications operators, has joined STORDIS' #Back2Open Program. The #Back2Open Program supports Cumulus Linux users who are looking to switch back to another Open Networking Operating System (NOS), like IP Infusion's OcNOS.

Current Cumulus Linux users may find themselves without a clear path forward, due to the recent acquisition of Cumulus Linux. #Back2Open was created by STORDIS to help these users migrate from their existing end-of-life platforms to a feature-rich and actively supported Open Networking Operating System ([more information can be found here](#)).

To kick-off this extended partnership both parties will hold a joint live webinar on November 16th 2021, where they will talk about:

- Introduction to STORDIS' #Back2Open Program for Cumulus Linux users
- Introduction to IP Infusion's use cases and their proven operating system OcNOS for Open Networking
- Advantages of switching from Cumulus Linux to IP Infusion OcNOS

Additional information on the webinar and the possibility to register for the event [can be found here](#).

"We are really excited to see that a Partner as strong as IP Infusion has decided to join our #Back2Open Program to help our customers migrate back to Open Networking. With all of IP Infusion's supported features and hardware compatibility with a wide range of open networking switches and routing platforms, Cumulus Users will be able to take their networks to the next level." – **Łukasz Łukowski, Chief Sales & Marketing Officer, STORDIS**

"Cumulus Linux users who need to migrate to open networking can count on IP Infusion. As a reliable and trusted provider of open network operating systems that offer rich features and a solid roadmap, IP Infusion delivers our OcNOS® products to the broad data center solutions for the Back2Open program. We are dedicated to helping to bring Cumulus Linux users back to their Open Networking path." – **Atsushi Ogata, President and CEO, IP Infusion**

About STORDIS

With offices in Germany and the United Kingdom, STORDIS support Customers in the EMEA region providing Professional Consultancy, Solution Design, Integration and Support Services dedicated to effectively deploying and extending the customer's networking requirements.

STORDIS a key Partner of the Open Networking Community and fully committed to promoting the evolution of Disaggregated Networking with their active engagement in projects such as SONiC, DENT, ONOS (Open Network Operating System), STRATUM and Trellis.

STORDIS maintains two of the most Advanced Technical Laboratories for Open Networking Infrastructure in Europe containing 1G, 10G, 25G, 40G, 100G and 400G solutions running various switch Operating Systems (NOS), NetOps/DevOps Automation platforms as well as Monitoring and Management Frameworks.
