

STORDIS is one of Europe's leading companies for innovative network technologies such as 'Open Networking'. Our customers are international corporations, public institutions and leading companies within the telecommunication, security, finance, and broadcast industry. At our headquarters in Stuttgart, Germany, and our offices in Gloucestershire, UK and Leszno, Poland, we develop our own software solutions and drive innovations forward within the market.

STORDIS is growing fast, and our international software development department is looking for an experienced new team member in the position of:

Network Systems Engineer

As a member of our network systems engineering team, you will support our team in consulting customers with the design and creation of tailor-made Open Disaggregated network environments as per their requirements and needs. You will run proof of concepts, proof of deliveries and support our customers throughout the implementation phase of their network infrastructure.

What you'll be doing:

- You will consult with customers on how to develop and optimise network infrastructures
- You will consult with customers about network architecture designs based on the latest open networking technology
- You will assure functionality of the combination of hardware, software and services to meet complex customer requirements
- You will maintain customer relationships and continuously deliver advice to identify requirements and additional opportunities
- You will provide consultative advice to our technical team and work closely with our software development department
- You will use in-depth product knowledge and technical expertise to assist our sales staff in meeting our customers' needs to drive additional revenue
- You will provide specific technical support as well as customised solutions

Required Skills & Qualifications:

- Degree in Computer Science or equivalent
- 3+ years of Industry experience in consulting network environments
- A profound knowledge of network infrastructure engineering and practical experience
- Strong language skills in German and English
- Must be customer focused and have the ability to establish solutions to complex technical issues
- The ability to work both independently and as part of a team, in a well-structured manner
- Knowledge of standard network topologies in data centers, campus environments, telco/service provider etc.
- Knowledge of network protocols like BGP, EVPN, VXLAN, 802.1q etc.

Preferred Skills:

- Knowledge of network protocols like BGP, EVPN, VXLAN, 802.1q etc.
- Working knowledge of Linux environments
- Understanding of network automation (tools such as Ansible, Netbox)
- Understanding of network management interfaces such as REST, GNMI or others

What we offer:

STORDIS is a cutting edge, international company with offices across Europe – but we are still small enough to care about our employees. We are offering a full-time position in a company that has been building its reputation within the industry for over 15 years. We offer an attractive salary, flexible hours and the option to support home office working.

We believe in developing our people and use internal training and advanced education to allow them to build their knowledge and their careers, as this only improves the value that we can offer to our customers.

You will be working on a variety of interesting internal and external projects, making full use of our test lab kitted out with some of the latest technology available. The people you will be working with are all passionate about open networking, with their individual experiences and skill sets coming together to make a formidable team!

However, it is not ALL hard work. We have an excellent team spirit and often have after-work activities as well as regular bonding sessions bringing our whole international family together.

Your next step:

Are you ready to shape the future of networking technology with us? Great! Please send your applications to jobs@stordis.com. Please kindly provide your earliest possible start date and your salary expectations. Your personal information will be treated as strictly confidential.

STORDIS is an equal opportunities employer and will consider qualified applicants for employment without regard to gender, age, or national origin.
