

## **STORDIS, Edgecore, and Credo Strengthen Collaboration with Advanced Dual TOR Cables, Low Power CLOS AECs, and Cutting-Edge Networking Solutions**

**Stuttgart, Germany – April 18th, 2023 – STORDIS - The Open Networking Expert** - today announced the deepening of its collaboration with Edgecore Networks and CREDO to deliver advanced Dual TOR cables, Low Power CLOS Active Electrical Cables (LP CLOS AECs), and cutting-edge networking solutions for data centers. Building on years of successful partnership with Edgecore and a strong first year with CREDO, STORDIS is aggregating disaggregation by bringing together industry-leading open networking solutions.

Edgecore Networks, a leading provider of open and disaggregated network solutions, offers DCS520, the high-density spine switch for high-performance data centers. The DCS520 is equipped with Broadcom's Tomahawk 4 chipset, which boasts a remarkable 25.6 Tbps switching capacity and low latency performance. Together with Enterprise SONiC distribution by Edgecore, the DCS520 provides flexible and high-efficiency data processing, enabling users to handle and manage large amounts of data with ease. This makes it an ideal solution for service providers, cloud operators, and data center interconnect use cases in metro environments.

CREDO's innovative Dual TOR cables are compatible with SONiC and strengthen Credo's robust 400G and 800G portfolios. These cables provide seamless implementation, eliminating the need for rack redundancy and reducing power and cost. Additionally, Credo's HiWire™ LP CLOS AEC is a thin, low power 800G AEC designed for in-rack applications, replacing backplanes in Distributed, Disaggregated Chassis (DDC) implementations. Plug & play LP CLOS AECs consume up to 75% less rack volume than traditional copper cables, enabling interconnect densities of up to 1,000 cables per rack.

By combining the expertise of STORDIS, Edgecore, and CREDO, these companies strive to enable customers to optimize their data center infrastructure for the future.

*"As we continue to collaborate closely with Edgecore and CREDO, we are revolutionizing the data center industry with our cutting-edge solutions. Together, we provide customers with high quality, cost-effective, and reliable solutions for their data center needs."* - **Łukasz Łukowski, Chief Sales & Marketing Officer, STORDIS**

*"Our long-standing partnership with STORDIS and our collaboration with CREDO have enabled us to push the boundaries of open networking solutions. We are proud to be a part of this innovative collaboration, delivering excellent data center technology to our customers."* - **Nanda Ravindran, Vice President of Product Management, Edgecore Networks**

*"Credo is excited to work closely with STORDIS and Edgecore, leveraging our strong 400G and 800G portfolios, innovative Dual TOR cables, and our power LP CLOS AECs, to deliver advanced data center solutions. This collaboration is a testament to our commitment to providing high-performance, low-latency, and energy-efficient solutions to the industry."* - **Ameet Suri, Head of AEC Business Development, Credo**

## About STORDIS

At STORDIS, we specialize in Open Networking Solutions and will help you find the best solution for your needs. We offer a consultancy service, where our experts analyze your existing network infrastructure as well as your future requirements and propose the best tailored solution and service. We can then design your future network infrastructure based on scalable and flexible Open Networking Technologies. Finally, we plan, install, integrate and optimize the solution in your new or existing environment. Please visit our websites for more details: [www.stordis.com](http://www.stordis.com), [www.stordirect.com](http://www.stordirect.com)

STORDIS also has your SONiC training covered as well! We have been working together with Edgecore to provide the leading global Authorized Training Centre for Enterprise SONiC – The Route2Open Academy. This is the official on-line course where our expert instructors will guide you through your first steps into the world of Open Networking with Enterprise SONiC. It is a mixture of on-line video tutorials, demonstrations, written materials and on-screen examples. This course is broken down into several modules which cover installation, set-up, maintenance, and troubleshooting, with an on-line exam at the end of each module to reinforce what you have learned. For more information, visit: [www.route2open.com/sonic-course](http://www.route2open.com/sonic-course)

Don't forget that STORDIS can also assist you in areas other than SONiC. We have our Open2Support package which can extend your standard warranties, provide next business day hardware replacements (depending on location), 24x7 phone / email support on hardware & software issues and next business day on-site technical engineer support. For more information, visit: <https://stordirect.com/product-category/services/>

## About Edgecore Networks

Edgecore Networks Corporation is a wholly owned subsidiary of Accton Technology Corporation, the leading network ODM. Edgecore Networks delivers wired and wireless networking products and solutions through channel partners and system integrators worldwide for data center, service provider, enterprise, and SMB customers. Edgecore Networks is the leader in open networking, providing a full line of open 1G-400G Ethernet switches, core routers, cell site gateways, virtual PON OLTs, packet transponders, and Wi-Fi access points that offer a choice of commercial and open source NOS and SDN software. For more information, visit [www.edge-core.com](http://www.edge-core.com)

## About Credo

Credo, a fabless semiconductor company, focuses on breaking bandwidth barriers in the data infrastructure market. Founded in 2008, Credo specializes in high-performance, power-efficient, and cost-effective connectivity solutions based on their strong SerDes IP portfolio. With a history of innovation and a team of industry experts, Credo has offices in both North America and Asia, delivering tailored solutions to meet their customers' diverse requirements.
