

STORDIS is one of Europe's leading companies for innovative network technologies such as 'Open Networking'. Our customers are international corporations, public institutions and leading companies within the telecommunication, security, finance, and broadcast industry. At our headquarters in Stuttgart, Germany, and our offices in Gloucestershire, UK and Leszno, Poland, we develop our own software solutions and drive innovations forward within the market.

As a result of positive progress, we are expanding and need to add a new team member to create our new website, so we are looking for an experienced new team member in the position of:.

## PHP/Wordpress Developer (m/w/d)

**At STORDIS, we are looking for someone to take our website to the next level and provide our customers and industry partners with a first-class service. We want our customers to have the best possible experience when dealing with STORDIS online!**

### What you'll be doing:

- Creating a new ecommerce website from the ground up
- Integrating data from back-end services into the portal
- Implementing new custom features and improving our current Woocommerce based e-commerce website
- Working with our marketing team to create user interfaces
- Working with our technical teams to create a virtual design environment
- Working with internal and external parties to fulfil the design brief
- Creating automated workflows for use with the website
- Developing and automating test cases and create proofs of concept

### Skills & Qualifications:

- 4+ years' experience in creating ecommerce websites
- Experience with integrating other systems
- Previous history of deployment of a new ecommerce website
- Experience with Woocommerce would be beneficial
- The ability to demonstrate programming skills, writing well designed, testable, efficient code by using best software development practices
- Good working knowledge of REST API's
- Experience integrating data from various back-end services and databases
- Proven working experience in web programming
- A solid understanding of how web applications work including security, session management, and best development practices
- Experience with front end programming (including but not limited to JavaScript / HTML / CSS)
- Knowledge with GIT version control system
- You have worked in an Agile Environment before
- Self-driven, Ready to learn new technologies and Able to adapt different roles in the project
- Excellent communication skills in English

## What we offer:

STORDIS is a cutting edge, international company with offices across Europe – but we are still small enough to care about our employees. We are offering a full-time position in a company that has been building its reputation within the industry for over 15 years. We offer an attractive salary, flexible hours, and the option to support home office working.

We believe in developing our people and use internal training and advanced education to allow them to build their knowledge and their careers, as this only improves the value that we can offer to our customers.

The people you will be working with are passionate about open networking, with their individual experiences and skill sets combining to make a formidable team! However, it is not ALL hard work. We have an excellent team spirit and often have after-work activities (Table Football, Pool, Darts, Ping Pong, summer barbecues anyone?) as well as regular bonding sessions bringing our whole international family together.

## Your next step:

Did we catch your attention?

Please send us your application to [jobs@stordis.com](mailto:jobs@stordis.com) and provide your earliest possible entry date and your salary expectations. Your personal information will be treated as strictly confidential.

STORDIS values equal opportunity and considers qualified applicants for employment without regard to gender, age or national origin.
