# SwitchON Service

SwitchON Service is designed to help you understand the technology of a Bare Metal Switch Platform and how it can be leveraged together with different available Network Operating Systems (NOS).

The session covers all steps required to bring the newly purchased system into a state to start with the configuration:

- Connecting the system via a serial interface
- Introduction of ONIE and how it is used to trigger the installation
- Configuration of the ONIE interfaces and preparation to install the NOS
- Installation of the NOS image
- First time connect of the NOS
- Licensing the NOS

The service comprises **2 hours** of STORDIS qualified Engineer's time, which can be also used for other tasks like:

- Topology design support
- NOS configuration support
- General troubleshooting
- Technical support
